

St. XAVIER'S COLLEGE, SIMDEGA

NCC Class by PI.And Report

Date: 22 April 2026

Time : 10:15 am to 12:15 pm

Venue : St. Mery High School Ground, Samtoli and Room No. 37

Aim of Drill Class

- To develop discipline and obedience among cadets/students.
- To improve coordination, alertness, and teamwork.
- To build confidence, leadership, and command ability.
- To create smartness in movement and appearance.
- To train students to follow commands quickly and correctly.

Aim of Weapon Theory Class

- To provide knowledge about weapons and their handling.
- To teach safety precautions while using weapons.
- To improve firing skills and accuracy.
- To develop confidence, responsibility, and self-control.
- To train cadets for defense preparedness and military discipline

Drill Class Outcomes

- Discipline & Bearing: You learn to follow commands instantly and maintain posture. That "attention" stance becomes second nature.
- Teamwork & Coordination: Squad drill only works if everyone moves as one. You learn timing, unity, and watching out for your buddies.
- Confidence & Leadership: Giving commands, leading a squad, marching in front — it kills stage fear fast.
- Physical Fitness: Standing long hours, quick turns, marching — it builds stamina and body control.
- Ceremonial Skills: You get parade-ready for events like Kargil Diwas, Republic Day, Independence Day.

Weapon Theory Class Outcomes

- **Weapon Handling & Safety:** First rule you learn — treat every weapon as loaded. Safety drills, loading/unloading, stripping/assembling .22 rifle or INSAS.
- **Marksmanship Basics:** Correct aiming, trigger control, breathing, firing positions like lying, kneeling. Goal is to group shots tight.
- **Responsibility:** Handling a weapon teaches maturity. One mistake = serious consequences, so it builds alertness.
- **Confidence Under Pressure:** Firing on a range for the first time is nerve-wracking. Doing it safely builds real confidence.
- **Knowledge for Exams:** WT is part of B and C certificate exams. Good scores here help with SSB, Army/Navy/Air Force entries.

On 22 April 2026, an NCC training session was conducted by the PI Staff. The session included both practical and theory classes aimed at improving the cadets' knowledge and discipline. The training began with a drill session where the PI Staff explained the techniques, rules, and regulations of marching and the DST (Drill and Squad Test). Cadets were guided on proper body posture, coordination, and timing during marching. Special emphasis was given to the correct method of saluting while on parade. The drill session continued for one hour, allowing cadets to practice and improve their performance.

(Affiliated to Ranchi University, Ranchi)
Jharkhand, India

Following the drill, a theory class was conducted. During this session, important topics related to NCC training were taught. The PI Staff provided detailed information about the 5.56 mm INSAS Rifle, including its features and basic handling. The class also covered Field Craft and Battle Craft, focusing on survival techniques, movement in the field, and combat awareness.

Additionally, cadets were taught Judging Distance, which helps in estimating distances accurately during field operations. The session also included lessons on Section Formation and Movement, explaining how cadets should move and operate in a group during different situations. Lastly, the importance of Field Signals was explained, highlighting non-verbal communication methods used during operations.

Overall, the session was informative and helped enhance both practical and theoretical knowledge of the cadets. It also improved discipline, coordination, and understanding of military procedures.
